## Arc Environmental Credentials

We believe in creating products that are as environmentally innovative, as they are technically advanced, with the minimum possible impact on our planet.

Four key pillars shaped the product design for Arc :

- Long product life – over 50,000 cycles
- Reduce plastic waste in packaging
- Make recycling easy, by labelling materials and considering disassembly at end of life.
- Have a high content of recycled and recyclable materials.

---

## Credentials

- Recycled content >40% (typically 56%)
- Recyclable content >90% ( typically 99% )
- BIFMA M7.1-2011
- BREEAM International GN22
- LEED v4
- Indoor Air Comfort GOLD
- ANSI / BIFMA – 2011
- BS EN ISO 11469 marking of plastics

## Potential credits for LEED and BREEAM projects

- LEED ®
- MR Credit 4.1, 4.2 Recycled Content
- IEQ Credit 4.5 Systems Furniture LEED v4
- BREMA GN22 : BREAM Recognised Schemes
